SUMMARY

Final-year B.Tech Computer Science student specializing in Python backend development (FastAPI, Flask, Django) with hands-on experience designing RESTful APIs and working with relational and NoSQL databases. Building applied knowledge in Machine Learning and AI systems. Strong foundation in Data Structures & Algorithms and Object-Oriented Programming. Seeking a software engineering role to contribute to large-scale backend systems and AI-enabled applications.

EDUCATION

Punjab Technical University <i>Bachelor of Technology in Computer Science & Engineering</i>	2022 – 2026 CGPA: 7.0
Central Public School, Samastipur <i>Higher Secondary (Class XII)</i>	2019 – 2020

TECHNICAL SKILLS

Languages: Python, C++, SQL, Java (Core)
Frameworks & Libraries: FastAPI, Flask, Django, REST APIs
Databases: MySQL, MongoDB, PostgreSQL
Tools & Platforms: Git, GitHub, Postman, VS Code
CS Fundamentals: Data Structures & Algorithms (DSA), OOP, Operating Systems
Domains: Backend Development, Applied AI, Machine Learning (learning)

PROJECTS

API Optimizer <i>FastAPI, Python, MySQL, Caching</i>	2026
– Developed a backend system to optimize API performance by reducing response latency using caching and efficient request handling. – Implemented in-memory caching techniques to minimize redundant database queries and improve response time. – Designed scalable REST APIs capable of handling concurrent requests efficiently. – Optimized database interactions and query execution to enhance backend throughput and performance. – Built modular and maintainable backend architecture using FastAPI best practices.	
OpenAI Status Monitor <i>FastAPI, Python, Async Programming, MongoDB</i>	2026
– Built a backend system to monitor the availability and performance of OpenAI API endpoints in real-time. – Implemented asynchronous processing to check multiple API endpoints concurrently, improving monitoring efficiency. – Tracked uptime, response status, and failure rates to detect service disruptions quickly. – Stored logs and monitoring data in MongoDB for scalable and efficient data handling. – Designed system architecture focused on reliability, performance, and real-time monitoring capabilities.	

CERTIFICATIONS

Python & SQL Professional Course — Qspiders
Cyber Awareness AI Basic — NIIT FOUNDATION
Professional Edge Program — NIIT FOUNDATION
Core Java — INTERNSHALA

ACHIEVEMENTS & ACTIVITIES

Participated in AMD AI Premier League (AAIPL) at IIT Delhi (Track 1); developed LLM-based Q-Agent and A-Agent using prompt engineering, secured Rank 145 out of 170 teams.
